Our DNA

Technology Inspired Living

The name LIVEY is a direct expression of our founding philosophy—**Technology Inspired Living**. We believe that purposefully designed technology hardware can meaningfully improve how people work, collaborate, and connect every day. **Headquartered out of Delaware, United States of America**, we bridge the gap between enterprise-grade engineering and global accessibility, ensuring that the "Gold Standard" of tech is available to every professional and creator, everywhere.

Beyond Audio

Building the Total Ecosystem

We began our journey by mastering the art of the **"Smart Headsets"**, perfecting AI-Powered Noise Suppression hardware & software to ensure that every voice, from a busy call center in Manila to a boardroom in Dubai, was heard with crystal clarity.

As the way we live and work evolved, So did We! We recognized that true **"Inspired Living"** requires a seamless synergy between all the tools we touch. Today, LIVEY is transforming into an all-encompassing tech powerhouse, delivering a comprehensive ecosystem.

We have organized our innovation into specialized pillars, each designed to elevate a specific aspect of the modern human experience:

The Enterprise Pillar: Intelligent Collaboration

The Lifestyle Pillar: High-Fidelity & Utility

LIVEY's Product Portfolio

Enterprise Pillar

AI Powered
Audio Solutions

A

Audixa Series

UHD Video Solutions

G
